### DETAILED ACTION

Applicant's election of Species II in the reply filed on 4-4-2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

#### *Claim Rejections - 35 USC § 112*

Claims 5-9 and 14-19 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The claimed invention is directed toward the Figure 7 embodiment wherein the current sources are to be controlled by the error-amplified voltage. This error amplified voltage is shown by Figure 7 as being connected to ground. This makes it an impossibility for this voltage to control the current sources Ic and Id. Furthermore the specification does not disclose any other means for connecting the amplified voltage to the ramp generator. Thus, one would have to engage in undue experimentation in order to make and/or use the invention.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 2005/0077971 to Bashar, Herzog 3,944,949, Van Tuiji et al. 6,107,894 and Verhoeven 6,225,872 all disclose the general state of the art.
